1989 – 1992	Electrical Engineer, WSP Consulting Engineers
1981 – 1989	Apprentice/Electrician/Tech. Asst, South Tyneside Council

David is a very experienced building services engineer with an electrical bias. He served his apprenticeship with a local council before joining a national engineering consultancy where he worked his way quickly through the ranks. He was one of the founding directors of Desco, spending three years developing the practice before leaving to pursue opportunities in the Middle East.

David made a welcome return to the practice in September 2007 having spent the previous three years in the rapidly developing Middle East state of Qatar. Working as a client's representative for Qatar Petroleum, David was part of a Special Projects Division appointed by the Qatari government to procure and project manage a number of major landmark construction projects.

David takes responsibility for one of the design teams in the Sunderland office and for the technical delivery of a number of the practice's major projects.
